

Identification

by Angie

Vincent always examined unusual insects he spotted in the tunnels. One day, Cullen found him examining a long, green insect near the dining hall.

“Gah! What is it?” Cullen asked.

“I don’t know. But I will try to find out,” Vincent declared.

Many insects did not appear in their limited entomology reference books.

Later that day, a small box containing two unique magnets and a note was delivered to him.

“These are the kinds of bugs I like.

- Cullen”

Vincent added the two insects to his collection with a chuckle. These were easily identified. Cutlery forks!
